

Responses to Shareholders' Inquiries Not Addressed During the Meeting

Ms. Suthida Vejjacheewa What is AIS's future direction regarding the renewal of the 3BBIF contract? Does AIS have any plan to establish its own infrastructure fund?

Answer The Company currently has a contract with the 3BBIF until 2038. Any renewal will be considered based on overall terms and conditions to ensure optimal benefits for both the Company and AIS shareholders.

Regarding the establishment of a new infrastructure fund, the Company currently has diversified funding options from both domestic and international financial markets with competitive financing costs. However, the Company remains open to all options that could create shareholder value, subject to careful and prudent evaluation.

Mr. Sitthipat Tripong What is AIS's view on the role of quantum computing in supporting its Digital Intelligent Infrastructure over the next three years?

Answer The Company adopts a proactive approach in embracing and applying new technologies to the operations on an ongoing basis, particularly those that enhance efficiency and service quality. For example, AI is being deployed in network management under the Autonomous Network Program.

Should new technologies with strong potential and relevance emerge, the Company remains open to adopting them and expanding collaborations in various forms to further enhance operational efficiency and deliver superior user experience in the long term.
